

Multiple shooting methods

Handheld shooting

Remote control with a tripod and extended exposure hand brake line

Technical Parameter **Portable X-ray machine**

Tube Voltage 60KV	Highest Voltage 70KV	Tube Current 2mA
Exposure Time 0.01-2s	Focus 0.4mm	Anode Target Angle 12°
Total Filtration 1.0mmAl	Battery Capacity 950mAh	

Portable X-ray

A smart dental digital solution

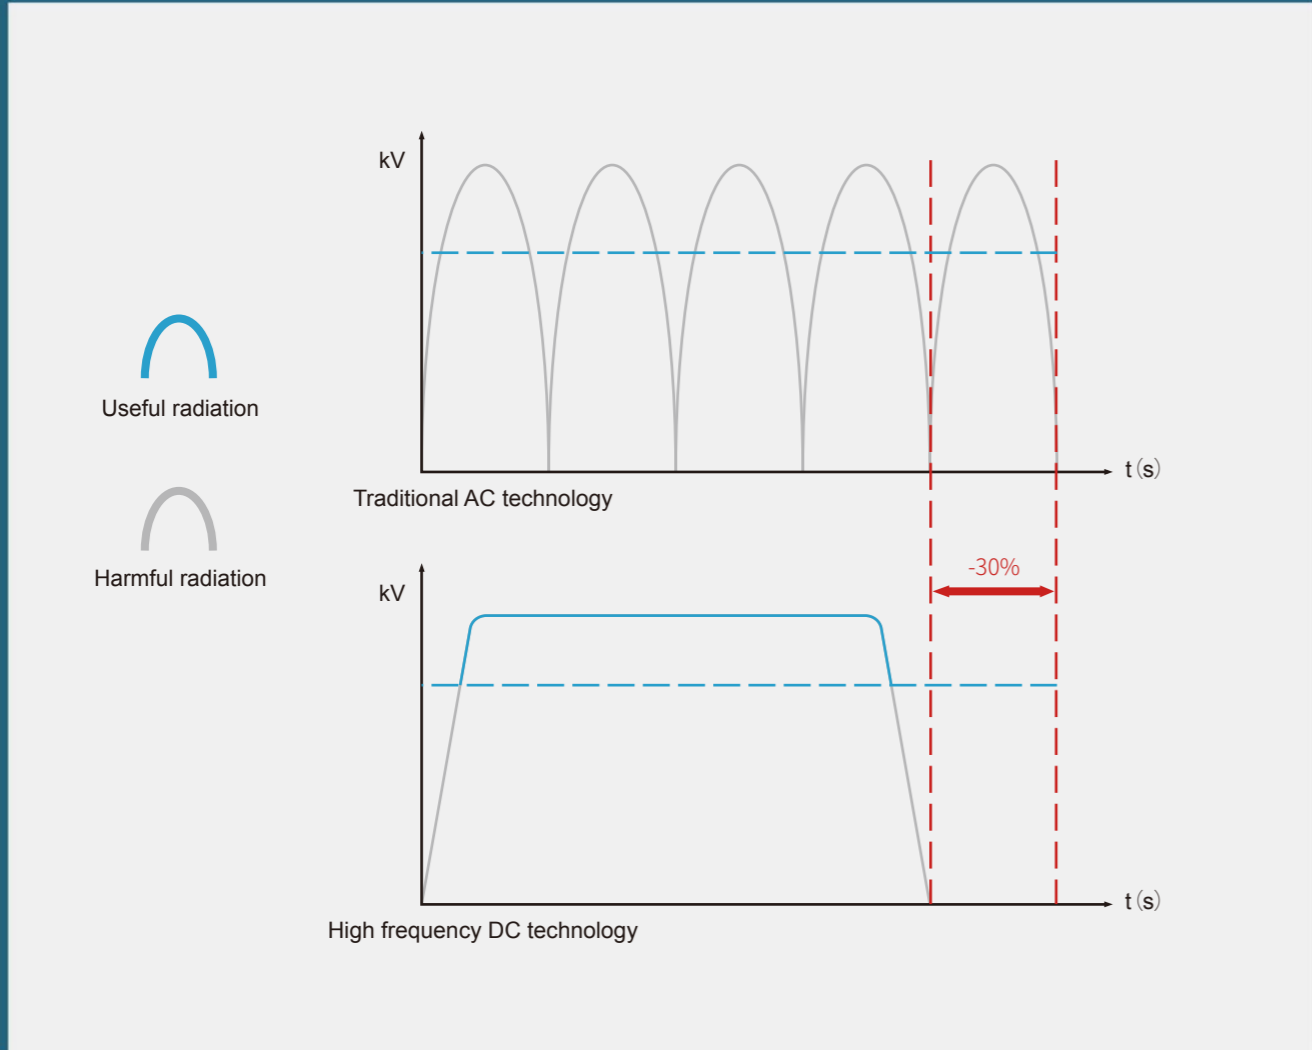

Fussen Technology Co.,Ltd

High frequency DC technology

Ultra-low radiation, the exposure dose is reduced by more than 30% compared with the standard generator, maximizing effective rays and greatly reducing the radiation intensity

Small focus to get high definition images

High-voltage generator with 0.4mm focus, high-definition imaging, enjoy top quality

High capacity lithium battery

950 mAh ultra high capacity battery, battery can be replaced, low cost of use

Humanized and easy operation

Shoot different teeth, fine-tune the shooting time, and achieve personalized and precise control
